

Illinois Community College Board

February 15, 2023

Dear Members of the General Assembly,

The enclosed report provides a status update on developmental education reforms for Illinois community colleges, as well as developmental education student outcomes by model as required by the Developmental Education Reform Act (110 ILCS 175/100). The report builds on previous developmental education work and reporting as part of Illinois Senate Joint Resolution 41.

Illinois community colleges continue to address student placement into, and student completion of developmental education. The main intent of new and innovative work within developmental education is to accelerate students into credit-bearing Gateway courses on their path to program completion. By reducing barriers to certificate and degree attainment it creates more equitable academic outcomes for underrepresented groups including African American students and Hispanic/Latino students, as well as students from lower socioeconomic status.

Developmental education allows academically underprepared students to build skills that are necessary for preparation and success of gateway mathematics and English courses as well as other college level courses. Colleges have developed and supported new models to deliver developmental education more successfully over time. When paired with wrap-around services, students see an even greater success in developmental education courses.

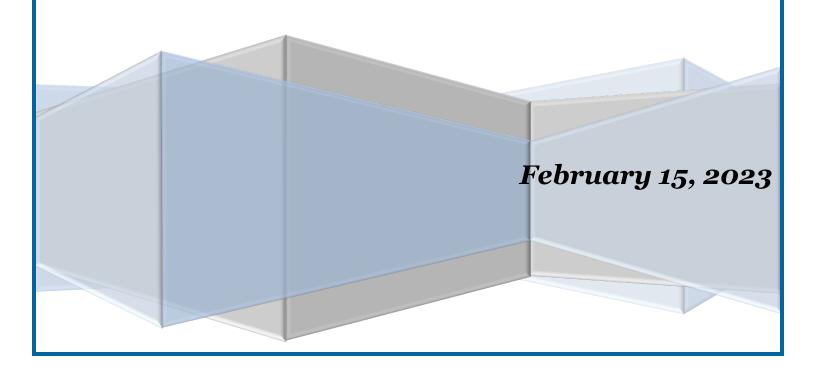

Sincerely,

Brian Durham, Ed.D. Executive Director

(110 ILCS 175/) DEVELOPMENTAL EDUCATION REFORM ACT

INTRODUCTION

Illinois community colleges continue to address student placement into, and student completion of developmental education. The main intent of new and innovative work within developmental education is to accelerate students into credit-bearing Gateway courses on their path to program completion. By reducing barriers to certificate and degree attainment it creates more equitable academic outcomes for underrepresented groups including Black or African American students and Hispanic/Latino students, as well as students from lower socioeconomic status.

Developmental education allows academically underprepared students to build skills that are necessary for preparation and success of gateway mathematics and English courses as well as other college level courses. Over time, colleges have developed and supported new models to deliver developmental education more successfully. When paired with wrap-around services, students see an even greater success in developmental education courses.

This report provides a status update on developmental education reforms for Illinois community college, as well as developmental education student outcomes by model as required by the <u>Developmental Education Reform Act (110 ILCS 175/100)</u>. The report builds on previous developmental education work and reporting for <u>Illinois Senate Joint Resolution 41</u>. As formal evaluation of developmental education course delivery and outcomes has occurred, it has been noted that any reform and scaling of this work must be steeped in equity practices, a deeper dive into dis-aggregated data and intentional reform of the work that benefits those who are enrolled and most impacted by developmental education.

Notable Findings on the Status of Developmental Education Reforms in the Illinois Community College System include:

- Illinois community colleges have continued to shift how they deliver developmental education courses since work within Illinois Senate Joint Resolution 41 concluded on December 31, 2020. The number of colleges that utilize only traditional developmental education models has decreased while the number of colleges who use another model of delivery has become more prevalent, particularly the use of the co-requisite model.
- Evaluation of college placement standards indicates that more than 90% of Illinois community colleges use multiple measures in both Mathematics and English Language Arts placement.
- When examining developmental education models in both the Mathematics and English Language Arts subject areas, the co-requisite model had substantially better results in students passing a gateway course in the first or second academic year of enrollment. While enrolling less students, other innovative models such as the compressed model are exhibiting positive results as well compared to the traditional mode of delivery.
- The co-requisite model had a higher percentage of students earning 24 or more credit hours in the first academic year as compared to the traditional model in both Mathematics and English Language Arts subject areas.

- When analyzing Fall-to-Fall retention, average hours earned in the second academic year of enrollment and completion rate, the performance across developmental education models is very similar. Additional longitudinal analysis of student cohorts from Fall 2020 and 2021 will occur at ICCB into academic years (2022-23) and (2023-24) for more conclusive results in the next iteration of the report (Fiscal Year 2025). However, preliminary results are showing that additional and increased student supports should be paired with innovative developmental education models to increase persistence, retention, and eventual program completion.
- Race/ethnicity achievement gaps are evident across many of the student outcomes and
 developmental education models. White students had higher rates of performance
 compared to their Black or African American and Hispanic/Latino peers across most
 measures. The co-requisite model had the best results by a substantial margin across
 race/ethnicities for percentage passing a Mathematics or English Language Arts gateway
 course with a C or higher in year one and year one and year two combined.
- COVID-19 impacted how Illinois community colleges approached both placement and delivery of developmental education courses in academic years 2020-21 and 2021-22. The pandemic made developmental education reform with students more difficult for a few community colleges while others furthered structures to assist with placement, including more fully adopting the statewide recommendations for placement. Nearly all colleges shifted to online delivery of English and Mathematics courses at different times during COVID-19. ICCB will continue to monitor the pandemic influence on developmental education reform as well as impact on student outcomes.

The Illinois Community College Board (ICCB) is the state coordinating organization for the Illinois Community College System-the third largest in the country and the leading public workforce development trainer in the state. Illinois community colleges serve over 600,000 residents each year in credit, noncredit, and continuing education courses. Illinois is home to 48 colleges in 39 community college districts which provide high quality, accessible, and cost-effective educational opportunities to the entire state.

Data for this report derive from required reports submitted by each Illinois community college outlining their efforts for reforming and scaling delivery of developmental education, reporting of work with external partners (Partnership for College Completion; Women Employed) who have assisted with scaling identified reform efforts, and the Illinois Community College Board's (ICCB) Centralized Data System. Specifically, within the ICCB Centralized Data System, the Annual Student Enrollment and Completion (A1) student-level submission, the Annual Course Data (AC) student-level submission, and the Fall Enrollment (E1) student-level submission allow ICCB to generate data and information within the report on student enrollment and outcomes for each developmental education model. Developmental education model variables were introduced by ICCB to the annual student-level data collection in academic year 2020-21.

DEVELOPMENTAL EDUCATION DEFINITION AND RECENT ILLINOIS LEGISLATIVE BACKGROUND

DEFINITION OF DEVELOPMENTAL EDUCATION AND DEVELOPMENTAL EDUCATION MODELS

Developmental education at Illinois community colleges is an approach to education that focuses on helping students achieve their full potential, through accessible pathways to college completion. Through developmental education, colleges can support both academic and personal growth of under-prepared students through instruction, counseling, advising, and tutoring.

"Developmental education" means instruction through which a high school graduate who applies to a college credit program may attain the communication and computation skills necessary to successfully complete college-level coursework.

"Developmental education course" or "developmental education coursework" means a course or a category of courses in which students are placed based on an institution's finding that a student does not have the proficiency necessary to succeed in an introductory college-level English language or mathematics course.

"College-level English language or mathematics course" or "college-level English language or mathematics coursework" means a course that bears credit and fulfills English language or mathematics credit requirements for a baccalaureate degree, a certificate, or an associate degree from a postsecondary educational institution.

Developmental education models are defined as follows:

- 1) **Traditional** developmental instruction places a student into a course level and the student completes the course sequence that leads to the course required for their respective degree. Courses are typically a semester long each.
- 2) **Co-requisite** developmental instruction or tutoring supplements credit instruction while a student is concurrently enrolled in a credit-bearing course. For example, a student would be enrolled in a credit-bearing course and take a related lab/course to supplement their learning.
- 3) **Compressed** developmental instruction accelerates student progression from developmental instruction to college-level coursework by reducing the length of the course. Course delivery is more intense, and courses are offered in a variety of shortened timeframes to allow students to progress quickly. For example, a course that was originally scheduled to meet once a week for 16 weeks could meet twice a week for 8 weeks.
- 4) **Modularized** developmental instruction is customized and targeted to address specific skills gaps through courses that are technology-based and self-paced. Course material is divided into sub-unit parts and allows students to master targeted skill area deficiencies. For example, one three-credit course could be converted into three one-credit courses, each targeting a different set of concepts to master.

- 5) **Emporium** developmental instruction eliminates all lectures and replaces them with a learning resource center model featuring interactive software and on-demand personalized assistance, including interactive tutorials, practice exercises, solutions to frequently asked questions, and online quizzes and tests. Students choose what types of learning materials to use depending on their needs, and how quickly to work through the materials.
- 6) **Contextualized** developmental instruction is content related to a student's program of study or meta-majors. For example, if a student were studying business or education, their writing prompts and or math would be related to those areas.

Additional developmental education models being tracked by ICCB but not yet offered at Illinois community colleges include:

- 7) **Stretch** developmental instruction is where students complete the college-credit-bearing course over two semesters instead of one because of the educational assumption that some students need more time and guidance based on their previous academic backgrounds and experiences. It is typically used in writing.
- 8) **Studio** developmental instruction involves students who would have normally been placed in the traditional developmental education course taking a credit-bearing gateway course. The sub-set of students in the credit-bearing course requiring developmental education is provided with additional supports in a lab-like setting. The supports usually come in the form of ad hoc interventions from the same instructor, a different instructor, or an academic support professional. It is typically used in writing.

This report builds on considerable previous work conducted under Illinois Senate Joint Resolution 41 and the Developmental Education Reform Act (110 ILCS 175/100.)

SENATE JOINT RESOLUTION 41

In 2019, the Senate of the General Assembly of the State of Illinois passed a Senate Joint Resolution (SJR) 41 that called for ICCB and IBHE to establish the SJR 41 Advisory Council for Developmental Education. This Council, in concert with ICCB and IBHE, was charged with 1) providing a benchmarking (inventory) report to the General Assembly on or before April 1, 2020, 2) a detailed report for scaling up developmental education reforms on or before July 1, 2020, and 3) a final report including an update on the implementation of reforms and outcomes for developmental education models. The completed reports are as follows:

- March 31, 2020. SJR 41 report titled <u>Inventory of Developmental Education in Public Community Colleges and Universities in Illinois</u>, and
- June 30, 2020. SJR 41 report titled <u>Scaling Developmental Education Reform in Illinois: A Report of the Senate Joint Resolution 41 Advisory Council</u>, and
- December 31, 2020. SJR 41 report titled <u>Final Report: Update on Implementation of Developmental Education Models in Public Community Colleges and Universities in Illinois.</u>

DEVELOPMENTAL EDUCATION REFORM ACT

The Developmental Education Reform Act (DERA) as part of HB2170 was signed into law in March 2021. DERA aims to address inequities in degree completion by race and income status by reforming developmental education placement and delivery. The legislation:

- Requires that on or before May 1, 2022, all community colleges use each of the following
 measures, as appropriate, to determine the placement of a student in introductory college-level
 English language or mathematics coursework and shall use the scores set forth in
 recommendations approved by the Illinois Council of Community College Presidents on June
 1, 2018:
 - 1. A student's cumulative high school grade point average.
 - 2. A student's successful completion of an appropriate high school transition course in mathematics or English.
 - 3. A student's successful completion of an appropriate developmental education or introductory college-level English language or mathematics course at another postsecondary educational institution.

In determining the placement of a student in introductory college-level English language or mathematics coursework, a community college shall consider the standardized test scores provided by the student for placement. A community college should also consider other individual measures as set forth in recommendations approved by the Illinois Council of Community College Presidents.

- Requires each public institution of higher education to publicly post its placement policy in a manner that is easily accessible to both students and prospective students.
- Requires that beginning no later than December 1, 2021, IBHE shall convene stakeholders to consider a multiple measures framework for placement into college-level coursework for Illinois public universities with considerations for math pathways and major requirements.
- Requires that on or before May 1, 2022, each public university submit to IBHE and each public community college submit to ICCB its institutional plan for scaling evidence-based developmental education reforms to maximize the probability that a student will be placed in and successfully complete introductory college-level English language or mathematics coursework within 2 semesters at the institution.
- Requires that on or before February 15, 2023, and every 2 years thereafter, IBHE and ICCB collect data and report to the General Assembly and the public the status of developmental education reforms at institutions.
- Requires that on or before February 15, 2024, and every 2 years thereafter, IBHE and ICCB, in consultation with institutions of higher education and other stakeholders, consider additional data reporting requirements to facilitate the rigorous and continuous evaluation of each

institution's implementation plan and its impact on improving outcomes for students in developmental education, particularly for Black students.

STATUS OF DEVELOPMENTAL EDUCATION REFORMS

The status of developmental education reform reflects significant improvements in the overall structure, placement, and content of developmental education. The plans submitted, although representative of a first attempt, outline strategies with preliminary supporting evidence for improving the outcomes of students in developmental education and reducing time to degree attainment and overall costs. Examples of these strategies include a shift from single placement mechanisms to multiple measures to assess postsecondary readiness and place students, streamlining developmental education through course redesign, such as offering co-requisite college-level courses, and implementing comprehensive, integrated, and progressive student support programs. The plans submitted reveal that nearly 90% are actively implementing and planning the design, implementation, and refinement of new programs to support continuous improvement in their developmental education model. This is an evolving process, but these reforms can allow students to complete the developmental education courses in a timelier manner through accelerated coursework sequences and other curricular revisions.

To align with the legislative requirements, reports also indicate that nearly 65% of schools have a proposed plan or a plan in use to address equity, and most are planning to utilize a data-driven approach to collect and assess data and ensure continuous improvement. The colleges were asked to illustrate plans designed to improve outcomes for Black students. Less than half of the schools provided plans that specifically addressed this question while the majority included the outcomes and support for Black students as part of the entire population of students. Clarification will be provided to schools to ensure appropriate and required data is collected going forward which speaks directly to improving outcomes and reforms for Black students.

The findings within the reports indicate that the institutions are taking an intentional approach to developmental education reform. The institutions are broadening placement measures to identify deficiencies that allow for a more holistic assessment of student ability. The institutions recognize that traditional developmental education course structure and sequencing creates barriers to completion. As a result, nearly all the plans show pathways and courses that have been streamlined and accelerated, or in some cases eliminated, to ensure success in developmental coursework. Institutions also recognize the importance of increased collaboration with local high schools and members of administration to align courses and build transition and bridge courses. Student support services are also a critical component of a successful developmental education program. Institutions are focusing on support programs that utilize a variety of areas designed to improve outcomes, provide student interventions throughout the duration of the course, which includes referral to resources, and increase persistence and completion. Professional development and training were also items commonly addressed in the plans. This is a necessary component to ensure students are learning effectively and instructors are providing engaging and rigorous instruction, as well as an understanding of the legislative requirements and the need for developmental education reform. This is equally as important as the support services for students

to ensure there is buy-in and instruction and coursework is evolving to meet the needs of the students.

DEVELOPMENTAL EDUCATION ENROLLMENT BY MODEL

The data provided in Tables 1-4, as well as Appendix A Tables, derive from the student-level ICCB Centralized Data System and represent any student enrolled in a developmental education model during the academic year. This can include students that are first-time, continuing, and transfer-in. Being inclusive of the entire student population provides a full, comprehensive picture of developmental education students and models in the Illinois community college system.

To reference developmental education model availability and implementation within Illinois community colleges prior to fiscal year 2021, the SJR 41 report titled *Final Report: Update on Implementation of Developmental Education Models in Public Community Colleges and Universities in Illinois* provides an inventory of developmental education models. Developmental education model information for SJR 41 reporting was captured through summary-level data via survey, while data/information within this report is utilizing student-level data within ICCB's Centralized Data System.

MATHEMATICS DEVELOPMENTAL EDUCATION MODELS

Table 1 provides the number of Illinois community colleges offering developmental education by model in Mathematics in fiscal years 2021 and 2022. In fiscal year 2022, for the 48 Illinois community colleges, most (N = 45) are providing the traditional model for Mathematics. Nearly half of the community colleges provide the co-requisite model (N = 22; 45.8 percent), followed by the compressed model (N = 10; 20.8 percent), other model (N = 8; 16.7 percent), emporium model (N = 3; 6.3 percent), and modularized model (N = 2; 4.2 percent). Compared to fiscal year 2021, models available at community colleges remained similar with an increase for the compressed model (N = +2), while fewer colleges were providing the emporium model (N = -3) and co-requisite model (N = -1).

Table 1
Number of Illinois Community Colleges by Developmental Education Model in
Mathematics, Fiscal Years 2021-2022

FY 21	45	23	8	2	6	8

SOURCE OF DATA: ICCB Centralized Data System—Annual Enrollment and Completion (A1) Data

Table 2 contains Illinois community student enrollment by developmental education model in Mathematics in fiscal years 2021 and 2022. Some students may enroll in more than one

developmental education model during an academic year. "Primary" is defined as the model the student was most recently enrolled in during the academic year. If a student was enrolled in two models, "Secondary" represents the model utilized most recently in the academic year before the transition to the primary model. In fiscal year 2022, examining the primary model, the traditional developmental education model had the highest enrollment count (N = 19,749), followed by corequisite (N = 2,398), emporium (N = 1,329), compressed (N = 922), other (N = 240), and Modularized (N = 198). Proportionally, the number of students enrolled in models for both fiscal year 2022 and 2021 were very similar.

ENGLISH LANGUAGE ARTS DEVELOPMENTAL EDUCATION MODELS

Table 3 provides the number of Illinois community colleges offering developmental education by model in English Language Arts in fiscal years 2021 and 2022. In fiscal year 2022, for the 48 Illinois community colleges, most (N = 41) provided the traditional model for English Language Arts. Nearly three out of four community colleges provided the co-requisite model (N = 35; 72.9 percent), followed by the compressed model (N = 9; 18.8 percent) and other model (N = 1; 2.1 percent). Compared to fiscal year 2021, there were two fewer colleges offering the traditional model, while the co-requisite and compressed models each exhibited increases in the number of colleges providing those models. The emporium model was offered by two colleges in fiscal year 2021 but none in fiscal year 2022. The other model decreased from three colleges to one college in fiscal year 2022. Proportionally, the number of students enrolled in models for both fiscal year 2022 and 2021 were very similar.

Table 3

Number of Illinois Community Colleges by Developmental Education Model in English
Language Arts, Fiscal Years 2021-2022

FY 21	43	33	4	0	2	3

SOURCE OF DATA: ICCB Centralized Data System—Annual Enrollment and Completion (A1) Data

Table 4 contains Illinois community student enrollment by developmental education model in English Language Arts in fiscal years 2021 and 2022. In fiscal year 2022, examining the primary model, the traditional developmental education model had the highest enrollment count (N = 9,634), followed by co-requisite (N = 5,988), compressed (N = 437), and other (N = 89). Proportionally, the number of students enrolled in models for both fiscal year 2022 and 2021 were very similar. There was a slight uptick in the proportion of students enrolled in co-requisite and coompressed models and a slight decrease in the proportion of students enrolled in traditional models.

SOURCE OF DATA: ICCB Centralized Data System—Annual Enrollment and Completion (A1) Data

DEVELOPMENTAL EDUCATION STUDENT OUTCOMES BY MODEL

The data provided in Tables 5-16, as well as Appendix B Tables, are cohort-based and represent first-time, full-time certificate/degree seeking students enrolled in a developmental education model upon entry in the Fall. The cohort methodology is identical to the U.S. Department of Education's Integrated Postsecondary Education Data System (IPEDS) first-time, full-time students, degree seeking cohort that encapsulates students both enrolling and not enrolling in a developmental education model upon entry. The benefit of utilizing a tracking cohort is the ability to examine multiple momentum points and completion across a set timeframe. ICCB introduced the developmental education model variables to its annual student-level data collection in Academic Year 2020-21 in response to recommendations in strengthening developmental education data collection processes from SJR 41. Thus, Fall 2020 first-time, full-time certificate/degree seeking students represent the first developmental education model cohort that ICCB is able to track and examine through student-level data within the ICCB Centralized Data System.

To reference developmental education model student outcomes within Illinois community colleges prior to fiscal year 2021, the SJR 41 report titled *Final Report: Update on Implementation of Developmental Education Models in Public Community Colleges and Universities in Illinois* provides momentum point outcomes and completion rates for developmental education models. Developmental education model information for SJR 41 reporting was captured through summary-

level data via survey while data/information within this report is utilizing student-level data within ICCB's Centralized Data System.

Community colleges are open access institutions and serve a significant number of at-risk students. COVID 19 exacerbated issues for many in that population and presented fiscal and technological challenges, childcare and family constraints, as well as strains on mental health. The timeframe for the analysis of developmental education models within this report occurs during academic years 2020-21 and 2021-22.

For Tables 5-16 and Appendix B Tables, data are suppressed in cells for five or few students and indicated with "DS".

MATHEMATICS DEVELOPMENTAL EDUCATION MODEL OUTCOMES FOR FIRST-TIME/FULL-TIME DEGREE-SEEKING STUDENTS

The information in **Table 5** provides statewide gateway course completion and certificate/degree completion outcomes for Fall 2020 first-time, full-time students by Mathematics developmental education model in Illinois community colleges. Appendix Table B-1 contains the same outcomes at the community college-level. Statewide, the co-requisite model, by a wide margin, had the highest percentage of students passing a Math gateway course with a C or higher for year one at 56.40 percent and year one and year two combined (61.19%). The traditional, compressed, modularized, emporium, and other models ranged from 0.0 percent to 18.42 percent for students passing a Math gateway course with a C or higher in year one. In examining year one and two combined for passing a Math gateway course with C or higher, beyond the co-requisite model, the compressed model had the highest percentage at 39.47 percent followed by the other, traditional, emporium, and modularized models.

Table 5
Illinois Community College Gateway Course Completion and Certificate/Degree Completion for Fall 2020
First-Time, Full-Time Students by Mathematics Developmental Education Model

	Total Students	Total Passing Math Gateway Course with C or Higher in Year One	% Passing Math Gateway Course with C or higher in Year One	Total Passing Math Gateway Course with C or Higher in Either Year One or Two	% Passing Math Gateway Course with C in or Higher in Either Year One or Two	Total Completions in either Year One or Two	% Completions in either Year One or Two

SOURCE OF DATA: ICCB Centralized Data System—Annual Enrollment and Completion (A1 & A2), Annual Course (AC), and Fall Enrollment (E1) Data

Table 6 encompasses the same Fall 2020 first-time, full-time student cohort by Mathematics developmental education model in Illinois community colleges as Table 5. In Table 6, persistence metrics in the first academic year are examined, including average hours earned and total students earning 24 credit hours or more. The retention metric of retaining students from the Fall term in their first academic year to the Fall term in their second academic year is also provided. For those students retained in the second academic year, the average hours earned are examined as a comparison point to the first academic year. Appendix Table B-1 contains the same outcomes at the community college-level.

Statewide, the modularized model had the highest rate of average hours earned in the first academic year (28.36 hours) and second academic year (25.11 hours). For the same measure in year one, the co-requisite, compressed, emporium, traditional, and other models ranged from 7.67 to 19.16 hours. By a wide margin, the modularized model had the highest percentage of students earning 24 or more credit hours in their first academic year at 61.36 percent followed by the co-requisite (34.59 percent) and compressed (32.89 percent) models. In examining retention (Fall-to-Fall) the outcomes were very similar across the models and ranged from a high of 66.07 percent for the emporium model to 57. 30 percent for the other model.

Table 6
Illinois Community College Persistence and Retention for <u>Fall 2020</u> First-Time, Full-Time Students by Mathematics Developmental Education Model

	Total Students	Average Hours in Year One	Total Earning 24+ Credit Hours in Year One	% Earning 24+ Credit Hours in Year One	Total Retained Fall-to-Fall	% Retained Fall-to-Fall	Average Hours in Year Two
Traditional	3,419	15.76	767	22.43%	2,092	61.19%	11.43
Co-Requisite	688	19.16	238	34.59%	432	62.79%	12.31

SOURCE OF DATA: ICCB Centralized Data System—Annual Enrollment and Completion (A1), Annual Course (AC), and Fall Enrollment (E1) Data

Table 7 contains statewide gateway course completion and certificate/degree completion outcomes for Fall 2021 first-time, full-time students by Mathematics developmental education model in Illinois community colleges. Appendix Table B-2 provides the same outcomes at the community college-level. The information in Tables 7 and 8 encompass a year newer cohort compared to the Fall 2020 cohort in Tables 5 and 6.

Statewide, the co-requisite model had the highest percentage of students passing a Math gateway course with a C or higher for year one by a substantial margin at 59.41 percent for the Fall 2021 cohort. The compressed, traditional, emporium, modular, and other models ranged from 0.0 percent to 15.45 percent for students passing a Math gateway course with a C or higher in year one.

Table 7

Illinois Community College Gateway Course Completion for <u>Fall 2021</u> First-Time, Full-Time Students by Mathematics Developmental Education Model

Table 8 encompasses the same Fall 2021 first-time, full-time student cohort by Mathematics developmental education model in Illinois community colleges as Table 7. Appendix Table B-2 provides the same outcomes at the community college-level. Statewide, the modularized model had the highest rate of average hours earned in the first academic year (23.67 hours). For the same measure, the co-requisite, emporium, traditional, compressed, and other ranged from 11.57 to 17.76 hours. By a wide margin, the modularized model had the highest percentage of students earning 24 or more credit hours in their first academic year at 51.85 percent followed by the co-requisite (29.39 percent) and traditional (23.01 percent) models. In examining retention (Fall-to-Fall) the emporium model had the highest rate (73.19 percent), followed closely by the traditional (62.96 percent), co-requisite (62.52 percent), and compressed (60.91 percent) models. The modularized model and other model had retention rates of 55.56 percent and 46.97 percent, respectively.

ENGLISH LANGUAGE ARTS DEVELOPMENTAL EDUCATION MODEL OUTCOMES FOR FIRST-TIME/FULL-TIME DEGREE-SEEKING STUDENTS

The information in **Table 9** provides statewide gateway course completion and certificate/degree completion outcomes for Fall 2020 first-time, full-time students by English Language Arts developmental education model in Illinois community colleges. Appendix Table B-3 contains the same outcomes at the community college-level. Statewide, the co-requisite model, by a wide margin, had the highest percentage of students passing an English Language Arts gateway course with a C or higher for year one at 65.76 percent and year one and year two combined (70.20 percent). The traditional model had a rate of 25.56 percent for those students passing an English Language Arts gateway course with a C or higher for year one and 39.99 percent for year one and two combined. Both the compressed model and other model have a low count of students enrolled which can potentially skew results.

Table 9

SOURCE OF DATA: ICCB Centralized Data System—Annual Enrollment and Completion (A1 & A2), Annual Course (AC), and Fall Enrollment (E1) Data

Table 10 encompasses the same Fall 2020 first-time, full-time student cohort by English Language Arts developmental education model in Illinois community colleges as Table 9. In Table 10, persistence metrics in the first academic year are examined, including average hours earned and total students earning 24 credit hours or more. The retention metric of retaining students from the Fall term in their first academic year to the Fall term in their second academic year is also provided. For those students retained in the second academic year, the average hours earned are examined as a comparison point to the first academic year. Appendix Table B-3 contains the same outcomes at the community college-level.

Statewide, the co-requisite model had the highest rate of average hours earned in the first academic year (16.80 hours). In the second academic year of enrollment, students in the co-requisite model averaged 11.58 hours. For the traditional model, students averaged 12.58 hours in the first year

and 9.38 hours in the second year. The co-requisite model had the highest percentage of students earning 24 or more credit hours in their first academic year at 22.59 percent, while the traditional model had a rate of 13.63 percent. For Fall-to-Fall retention, the co-requisite model had the highest rate at 61.74 percent with the traditional model having a slightly lower rate at 55.48 percent. Both the compressed model and other model have a low count of students enrolled which can potentially skew results.

SOURCE OF DATA: ICCB Centralized Data System—Annual Enrollment and Completion (A1), Annual Course (AC), and Fall Enrollment (E1) Data

Table 11 contains statewide gateway course completion and certificate/degree completion outcomes for Fall 2021 first-time, full-time students by English Language developmental education model in Illinois community colleges. Appendix Table B-4 provides the same outcomes at the community college-level. The information in Tables 11 and 12 encompass a year newer cohort compared to the Fall 2020 cohort in Tables 9 and 10.

Amongst models with at least 25 students enrolled, statewide, the co-requisite model had the highest percentage of students passing an English Language Arts gateway course with a C or higher for year one at 49.44 percent, followed closely by the other model at 48.28 percent and then the emporium model at 41.94 percent. The compressed model had a rate of 38.46 percent with the traditional model following it at a rate of 36.82 percent.

Table 12 encompasses the same Fall 2021 first-time, full-time student cohort by English Language Arts developmental education model in Illinois community colleges as Table 11. Appendix Table B-4 provides the same outcomes at the community college-level. Amongst models with at least 25 students enrolled, statewide, the emporium model had the highest rate of average hours earned in the first academic year (13.99 hours), followed closely by the compressed model at 13.92 hours and co-requisite model at 13.59 hours. For the same measure, the traditional model had a rate of 11.31 hours, while the other model was at 5.93 hours. For students earning 24 or more credit hours in their first academic year, the compressed model had a rate of 11.54 percent with the co-requisite model closely following at 11.15 percent. The traditional model had a rate of 9.27 percnet for the same measure, followed by the emporium model at 4.30 percent and other model at 3.45 percent.

Amongst models with at least 25 students enrolled, the compressed model had the highest percentage of students earning 24 or more credit hours in their first academic year at 11.54 percent, followed by the co-requisite (11.15 percent) and traditional (9.27 percent) models.

In examining retention (Fall to Fall) the emporium model had the highest rate 68.82 percent, followed by similar outcomes amongst the co-requisite (59.11 percent), compressed (57.69 percent), and traditional (56.00 percent). The other model had a retention rate of 51.72 percent.

SOURCE OF DATA: ICCB Centralized Data System—Annual Enrollment and Completion (A1 & A2), Annual Course (AC), and Fall Enrollment (E1) Data

DEVELOPMENTAL EDUCATION STUDENT OUTCOMES BY RACE/ETHNICITY AND PELL STATUS

As required by the Developmental Education Reform Act, student outcomes are disaggregated by gender, race and ethnicity, and federal Pell Grant status in Appendix Tables B1-B4 at the statewide and Illinois community-college-level. Further analysis below is provided for the race/ethnicity subgroup including Latinx and African American students, as well as students from lower socioeconomic status via the Pell status variable.

For the examination of student outcomes by race/ethnicity and Pell status, the Fall 2020 first-time, full-time student cohort by developmental education model in Illinois community colleges is utilized. The models need to have at least twenty-five (25) students in each of the White, African American, and Latinx race/ethnicity categories. For the Mathematics models, the traditional, corequisite, and emporium models met that criteria. For the English Language Arts models, the traditional and co-requisite models met these criteria.

MATHEMATICS DEVELOPMENTAL EDUCATION OUTCOMES BY RACE/ETHNICITY AND PELL STATUS

The information in **Table 13** provides statewide student outcomes for Fall 2020 first-time, full-time students by Mathematic developmental education model in Illinois community colleges for the following race/ethnic categories: Black or African American, Hispanic/Latino, and White. Appendix Table B-1 provides the same outcomes for all race/ethnic categories and models. Race/ethnicity gaps are evident across many of the student outcomes and models. White students had higher rates of performance compared to their Black or African American and Hispanic/Latino peers in average hours accumulated in year one, average hours accumulated in year two, percent

earning 24+ credit hours in year one, and Fall-to-Fall retention rate (except for the emporium model).

Hispanic/Latino students had higher rates of performance when examining percent passing a Math gateway course with a C or higher for the co-requisite model for both year one and year one and year two combined and emporium model in year one. Black or African American students had a substantial gap in performance for the same student outcomes. For Fall-to-Fall retention, there was a performance gap as well for Black or African American students as compared to White and Hispanic/Latino. As compared to White students, Hispanic/Latino students had a higher Fall-to-Fall retention rate for the emporium model.

The co-requisite model had the best results by a substantial margin across race/ethnicities for percent passing a Math gateway course with a C or higher in both year one and year two combined. Given the end goal is for students to complete a certificate or degree, additional longitudinal analysis (i.e., tracking students into academic year 2023) will be conducted with the Fall 2020 cohort to determine completion within 150% of catalog time. At the time of publication of this report, the ICCB Centralized Data System had full-year academic data through 2021-22. Currently, the completion rates from two years after entry are low across the models.

SOURCE OF DATA: ICCB Centralized Data System—Annual Enrollment and Completion (A1 & A2), Annual Course (AC), and Fall Enrollment (E1) Data

Table 14 provides statewide student outcomes for Fall 2020 first-time, full-time students by Mathematic developmental education model in Illinois community colleges by Pell status. Appendix Table B-1 provides the same outcomes for Pell status and all models. Gaps exist between Pell and Non-Pell students across some of the student outcomes, but it is not as evident as the Racial/Ethnic analysis. Non-Pell students outperformed Pell students across models in average hours in year one, average hours in year two, percent earning 24+ credit hours in year one, and Fall-to Fall-retention rate.

Examining percent passing a Math gateway course with a C or higher in year one and in year one and year two combined, Non-Pell students outperformed Pell students across most models but had comparable outcomes.

The co-requisite model had the best results by a considerable margin as compared to the emporium and traditional models regardless of Pell status for percent passing a Math gateway course with a C or higher in both year one and year one and year two combined.

ENGLISH LANGUAGE ARTS DEVELOPMENTAL EDUCATION OUTCOMES BY RACE/ETHNICITY AND PELL STATUS

Table 15 contains statewide student outcomes for Fall 2020 first-time, full-time students by English Language Arts developmental education model in Illinois community colleges for the following race/ethnic categories: Black or African American, Hispanic/Latino, and White.

Appendix Table B-3 provides the same outcomes for all race/ethnic categories and models. Race/ethnicity gaps are evident across many of the student outcomes and models. White students had higher rates of performance compared to their Black or African American and Hispanic/Latino peers in average hours accumulated in year one, average hours accumulated in year two, and percent earning 24+ credit hours in year one.

Gaps closed amongst White and Hispanic/Latino students when examining percent passing an English Language Arts gateway course with a C or higher in both year one and year two combined. Black or African American students had a substantial gap in performance for the same student outcomes. For Fall-to-Fall retention, there was a performance gap as well for Black or African Amerian students as compared to White and Hispanic/Latino students.

The co-requisite model had the best results by a substantial margin across race/ethnicities for percent passing an English Language Arts gateway course with a C or higher in both year one and year one and year two combined.

SOURCE OF DATA: ICCB Centralized Data System—Annual Enrollment and Completion (A1 & A2), Annual Course (AC), and Fall Enrollment (E1) Data

With the end goal for students being the completion of a certificate or degree, additional longitudinal analysis (i.e., tracking students into Academic Year 2022-23) will be conducted with the Fall 2020 cohort to determine completion within 150% of catalog time. At the time of publication of this report, the ICCB Centralized Data System had full-year academic data through 2021-22. Currently, the completion rates from two years after entry are low across the models. A third-year of tracking may result in an increase in completions overall and across subgroups. Academic year 2022-23 student-level data within ICCB's Centralized Data System will be available in November, 2023.
