EYE PROTECTION REVIEW

1. If a chemical splashes in your eye, use the eyewash to flush your eyes with water:
 - a. For no more than five minutes.
 - b. Until you feel uncomfortable — about one minute.
 - c. For at least an hour.
 - d. For at least 15 minutes.
2. If you weld or cut metal, which of the following are eye hazards?
 - a. Heat and glare.
 - b. Sparks and slag.
 - c. Ultraviolet and infrared radiation.
 - d. All of the above.
3. What can be used to eliminate the need for eye protection?
 - a. Equipment guards.
 - b. Face shields.
 - c. Eyewash facilities.
 - d. All of the above.
4. Equipment guards:
 - a. Must always be firmly attached to the equipment.
 - b. Can include movable screens that are set up during a welding job.
 - c. Never eliminate the need to wear eye protection.
 - d. Should be removed from a machine if they are in the way.
5. The best eye protection if you work in a dusty area is:
 - a. Safety glasses.
 - b. Goggles.
 - c. A face shield.
 - d. A welding helmet.
6. The best eye protection if you work with liquid chemicals is:
 - a. Safety glasses.
 - b. Safety glasses with side shields.
 - c. Goggles.
 - d. A welding helmet.

EYE

7. If you wear prescription glasses:
 - a. You don't need to wear eye protection.
 - b. You can wear safety glasses or goggles designed to fit over prescription glasses.
 - c. You must replace your prescription glasses with contact lenses.
 - d. You must wear a face shield over your prescription glasses.
8. Safety glasses:
 - a. Have lenses and frames that are stronger than regular sunglasses or prescription glasses.
 - b. Are not available in styles that look like regular glasses.
 - c. Provide the best protection from liquid splashes and sprays.
 - d. Are not available with tinted lenses.
9. To clean eye protection:
 - a. Wipe it with your shirt or a rag.
 - b. Use a recommended lens cleaner or warm, soapy water.
 - c. Use paint thinner or whatever solvent is handy.
 - d. Any of the above.
10. Face shields:
 - a. Eliminate the need for machine guards.
 - b. Eliminate the need for safety glasses or goggles.
 - c. Are the only eye protection available for people who wear glasses.
 - d. Protect the face — always wear safety glasses or goggles to protect your eyes, too.
