Student Leadership Issues and Opportunities
- Focus: Student Trustees and Student Advisory Committee (SAC)
 - Student leaders need our assistance with issue identification so they can help with affecting change.
 - Student leaders need structure; we should assist them by offering models to review and utilize.
 - Student leaders need to be educated on positional (via title) vs. authentic leadership.
 - We need to set the standard for our students by providing excellent role modeling for them.
 - We need to recruit students for leadership development opportunities on our campuses.
 - We should create opportunities for our student leaders to actually make an impact on our campuses including reporting back to them on how their efforts have affected change.
 - Note: your student trustee does not have to be appointed as your college's SAC representative. Also, you may appoint more than one student to participate on this committee.
 - Summer Institute is held in June 2006. Consider sending more than just your student trustee.
 - Nick and Karen Hunter-Anderson are available to us for resources.
