

Gender Neutral/Unisex Restrooms

Colleges	Do you have gender neutral/unisex restroom in every building? (I am not referring to family restroom with changing station)	If you have some of these designated restroom on your campus, how many do you have and how did you arrive at the decision? (An estimated number is fine)	What term or signage do you use to designate the gender neutral/unisex restroom?
Waubensee Community College	Not in every building.	Only one - in the Student Center	We have signage reflecting and male figure on one side and a female figure on the other with a line in-between them.
Rock Valley College	Not in every building; however, as we update and remodel buildings, this is a priority.	We currently have 2 gender neutral bathrooms in the Educational Resource Center (as it was remodeled). There will be 1 in each of our two major classroom buildings as renovations are made.	
Parkland College	Not in every building.	At this point, we only have 3 on campus. Two of them are in instructional wings of the main campus, and then we put one in the new Student Union.	The signs just say the word "Restroom" and show 3 graphics - the international female, male, and handicapped/wheelchair accessible graphics.
Highland College	We do not have any unisex or family restrooms on campus. People select the restroom intended for the gender with which they identify.	N/A	N/A
Oakton Community College	We don't yet but it is part of our master plan.	N/A	N/A

Kankakee Community College	KCC does not have gender neutral/unisex bathroom.	N/A	N/A
Lewis and Clark Community College	Not in every building.	Three. They're in locations where only a single restroom was available.	"Restroom" with a sign that shows both a man and woman.
Richland College	At Richland, we don't, but it has been a big topic of conversation from some of our student groups. Would be interested to know what others are doing.	N/A	N/A
Lincoln Land Community College	We have a number of unisex bathrooms on our main campus in Springfield and we have a unisex bathroom available at all our regional locations except one location where we rent the facility and were unable to make a unisex restroom.	We arrived at the decision after a discussion at Cabinet (President and all the folks that report to her); we all felt it was the right thing to do. It was honestly a very easy decision. It cost us about \$500 or so to change the signs, but was pretty easy.	Some of the unisex bathrooms were originally "family bathrooms". We just changed the signage. Our signage is a standard bathroom sign with the male/female symbol on it. We had a number of bathrooms across campus that were one stall and single-gender designated. So, we decided all of those single stall restrooms would be converted to unisex bathrooms.
John Wood Community College	We have two gender neutral restrooms for our main campus, so no we do not have one in all buildings. Please keep in mind we are less than 2000 students so the campus is not spread out as others experience with larger populations.	Two – centrally located on campus	We use gender neutral on our signage with both the male and female logo that you are used to seeing.
College of DuPage	No	There are none on campus at this time.	We have identified some potential areas on campus which could house such a washroom. Ultimately, the goal would be to have a gender neutral/unisex restroom in each building on campus.

Illinois Central College	We do not have one in every building but we are being more practice with adding these whenever there is an opportunity. We are also working to make them in more convenient locations.	We have 3 on our East Peoria Campus and we will have 2 at our North Campus. An area where we don't have one that I feel is critical is at our fitness facility. Currently it has been "wherever they went" but we are trying to put them in more consistently as we are completing a bathroom renovation across campus.	The current signs have both traditional gender signs and the word "Family." We are trying to determine the best wording
Kishwaukee College	YES	Currently we have one. That decision was made based on the restroom being in a central location. We are preparing to add to more which would bring the count up to three. Once again location, conveniences and accessibility for the student was the main formula.	I believe it is unisex.
College of Lake County	We do not but are going through a master plan and currently have planned for two at our lakeshore campus and one at our grays lake campus.	N/A	N/A
Black Hawk College	We have gender neutral or single person/use sex-specific restrooms in every building	We have gender neutral or single person/use sex-specific restrooms on most floors. At the most, they are one floor away from one of these restrooms. Our buildings are not massively large that it would constitutes a major hike to any one of these restrooms.	We have just ordered new "Unisex" restroom signs that are on campus awaiting installation
Moraine Valley Community College	Not in every building.	We have 2 gender neutral bathrooms on campus; one in the Student Union and the other in the Fitness Center. As the college continues to make updates to the facilities, more unisex bathrooms will be added.	Signage doesn't indicate a gender; it's basically indicated as a family restroom.
