

1. How many of you have a designated room for breastfeeding on campus?	
Rock Valley	Yes but not labeled as such
South Suburban	No--they use restrooms *Never been an issue
Highland	Yes--in each building
Rend Lake	No *Never been an issue
Southwestern	No *Never been an issue
Danville ACC	No *Never been an issue
LincolnLand	No--they use restrooms *No plan to add
Kaskaskia	We work to accommodate students and faculty with private spaces as they need them
Spoon River	No *Never been an issue
Triton	Yes
Shawnee	No
JJC	No
Heartland	Yes
Elgin	No--Students and staff who use our campus Children's center have the option of breastfeeding in the classroom or in an observation room if they prefer privacy
Waubensee	We work with our students on a case by case basis.
Oakton	No--Some have utilized the Health Services Office
Sauk	Yes
Parkland	Several multi-use "quiet areas" we put a small, quiet "meditation" room near the future space for our wellness activities, a second quiet room in the counseling area (primarily for students who need a place to remove themselves from the overstimulating campus environment, such as some veterans or students on the autism spectrum), and a larger, accessible, gender neutral restroom (not exactly ideal for lactation, but could be used if the other rooms are occupied). We discussed a lactation room with the architects, but found ourselves needing these rooms that could serve dual purposes.
Kankakee	We have one small office space reserved
LakeLand	We have no designated room. Students have used Health Services and private study rooms in our library
Harper	yes
BlackHawk	no
Carl Sandburg	We provide a room when a request is made
Moraine Valley	We have a designated space and provide a comfortable chair and sink in a private room. HR manages the room and the key.
Lewis and Clark	We do not have a designated room, but students and staff are able to use space in our Health Services Department.
ICC	Our Health Services in East Peoria has a rest area that can be used for this purpose. Our North campus also has space, but our DT location does not, but could easily accommodate due to the focus on health careers on the DT campus.
IVCC	We have a designated room that is locked--students must be let into the room by campus security.

2. Do you provide a refrigerator for students to store their milk?		Procedures/policies
Rock Valley	No	
Highland	No	
Triton	We have a small refrigerator that some students elect to use but most students will bring in an ice pack to keep the milk chilled.	If stored in the refrigerator, all containers are labeled and kept for the day.
Heartland	No	
Sauk	No	
Parkland	No but sometimes nursing mothers find their way to Public Safety, where there is a room used for health	
Kankakee	We don't have a separate refrigerator, however we have community refrigerators that folks are welcome to use. I have seen moms bring coolers for milk when needed.	Lactating mothers are directed to the front desk staff in Student Services. Staff open the locked room for the student and the student is asked to close the door when she leaves the room. This has been a rather smooth uneventful process for us.
Harper	We have provided a clean, private room with a comfortable seat and a sink but no refrigerator	
Carl Sandburg	We will provide a refrigerator if requested	
Moraine Valley	No	
ICC	We recommend that they bring their own cooler.	
IVCC	We will not provide a refrigerator
